Dear Parents

Year 3 Cooking

Cooking is a fun way in which we can explore many areas of learning. It will help us with our maths skills, our scientific understanding, working as a team, healthy eating and much more. However, this can be costly in school and may not be possible without some parent contribution. A small donation would be much appreciated so that these activities are possible. We would suggest a £3 donation. We ask that any contributions be handed to us at the classroom door. The outcome of cooking is sometimes sent home, but often the children share what they have cooked as a snack in school to further the learning opportunities created by the activity.

Kind regards,

The Year 3 team.
